

Blackboard – Mobile App – Downloading the Student App

The Blackboard mobile app enables students to view and interact with their Blackboard courses. The app is available for iOS 11+ and Android 5+ mobile devices. This handout will provide steps on how to download and install the app.

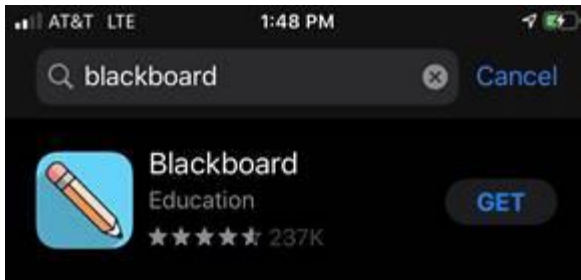

NOTES:

The operating system versions may change with updates to the app. Refer to the [Quick Start for the Blackboard App](#) page for information on the required versions.

These instructions were created using the iOS operating system. The Android operating system should be very similar.

Download and Install the App

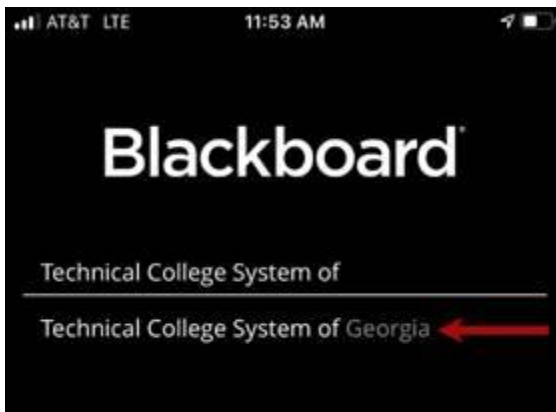

1. From the device, access the *app store*.
2. Search for *Blackboard*.

3. Install the app on the mobile device.
4. Select the **Blackboard** app.

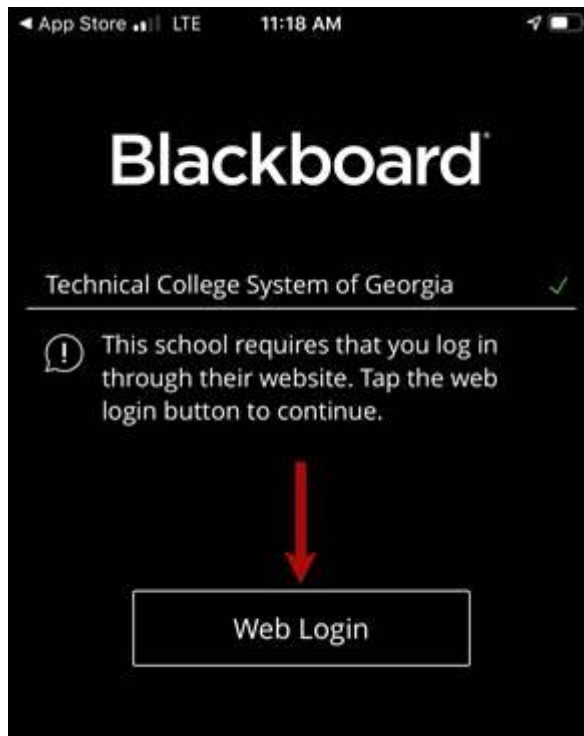

5. In the window that appears, search for the college and select it from the list.

NOTE: Be sure to enter **your** specific college when performing the search.

6. Select the **Web Login** button.

7. On the Blackboard screen, enter your *username* and *password* to login.

SINGLE SIGN ON

Sign in to your account

<input type="text" value="User Name"/>	<input type="password" value="Password"/>	<input type="button" value="Sign In"/>
--	---	--

Username: The first part of your SCTech email address before the @ sign

Password: Your SCTech email password

Note: All users must login to Office 365 at least once prior to accessing Single Sign On for the first time.
